### PROFILE

FileMaker Development has been my career for more than 12 years and I love what I do. While my work is diverse, my specialties are helping medium-sized companies optimize their workflows and integrate their data to the web via APIs and plug-ins. I work every day to stay on the cutting edge.

### EXPERIENCE

#### **FILEMAKER DEVELOPER, INDEPENDENT - JUNE 2013 • PRESENT**

Built advanced reporting tools, quote builder and survey integration for clients. Updated WordPress FileMaker Sync, a FileMaker plugin I wrote in Groovy (Java), as well as doing custom integrations for clients. Completed many WordPress integrations for clients. Modified WordPress websites with PHP and Javascript to include advanced search functionality. Maintained FileMaker best practice application. Implemented RESTful (and other) API integrations.

#### **FILEMAKER DEVELOPER, INFINITY ENERGY - JAN 2017 • AUG 2019**

Revisions and additions to a large CRM, project management and digital asset management system as well as adding a sales dashboard with the FileMaker PHP API and later the FileMaker API.

#### **FILEMAKER DEVELOPER, BECKER & MAYER!; SEATTLE, WA - NOV 2011 • JUNE 2013**

Extensively repaired, maintained and extended the primary operations database in a creative workplace. Advised on and built strategic workflow, inventory control, time tracking and operations systems. Managed several major projects that crossed departments including business analysis, workflow design, ERD, database architecture and programming. Enjoyed the challenge of facilitating decisions across a large group of stakeholders. Custom WordPress and Magento plugin integration.

#### **FILEMAKER DEVELOPER, INDEPENDENT; CHICAGO, IL - JAN 2010 - NOV 2011**

Built a wide diversity of applications for a variety of clients. Quoting system for lighting company. Estimating system for boiler installation company. Event management system for pharmaceutical meeting company. Collaborated with developers worldwide to design and maintain websites using WordPress FileMaker Sync.

#### **APPLICATION DEVELOPER, SOLIANT CONSULTING; CHICAGO, IL - JAN 2009 - JAN 2010**

Designed complex instrument calibration weight selection tool. Built software to speed telemarketing sales calls for a magazine publishing company. Adopted FileMaker industry standards and best practices across the board and worked collaboratively with other developers including outside vendors of plugins such as AutoSender, FMBooksConnector, SuperContainer and ScriptMaster.

#### **FILEMAKER DEVELOPER, INDEPENDENT; CLEVELAND, OH - DEC 2007 - JAN 2009**

Conducted independent study of software project management and business analysis methodologies, formalized use of the Agile style and UML protocols and put these skills to practice within both the systems I designed and the advice provided to my clients. Designed traffic system for photography studio and household electronics manufacturing.

#### **FILEMAKER DEVELOPER, E-ROOTS CONSULTING; COLUMBUS, OHIO - JAN 2007 - DEC 2007**

Began putting my formal training in database theory as well as my experience designing information systems with Excel and Access to practice. Used FileMaker to build a complex system for managing an industry association
